

# How to choose your eyeshadow colour

HERE ARE 5 STEPS TO CHOOSING YOUR EYESHADOW COLOUR

## 1.) BROWN EYES

If you have brown eyes, try wearing natural shades which will compliment your shading perfectly. If you want to ramp up the drama, try purple. This is a contrasting colour and can make your eyes really pop.

## 2.) BLUE EYES

If you have blue eyes, try copper, orange, bronze or coral, these colours will really help the blue of your eyes stand out. Stay away from blue eyeshadow as it can drain the colour from your eyes.

## 3.) GREEN EYES

If you have green eyes, try wearing gold, wine, burgundy or purple. These colours really flatter the green in your eyes, helping them to dazzle.

## 4.) GREY EYES

Those with grey eyes might consider wearing neutral browns, coppers, salmon, melon and for a dramatic effect, try orange.

## 5.) HAZEL EYES

If you have hazel eyes, look at wearing rich warm colours such as chocolate brown, chestnut brown, rich browns and red. These colours will make the gold in your eyes really pop.
