

How to cover your beard

HERE ARE 5 STEPS TO EFFECTIVE BEARD COVERT

1.) RED LIPSTICK

Using a clean sponge, brush or finger dot very lightly the red lipstick over the area where beard is showing through. Do not be heavy handed and only cover where needed. You may still see the dark of your hair, don't worry, that's ok.

2.)FACE POWDER

Using a large soft brush, sweep mineral powder (face powder) over the area where the lipstick is. This helps to set it so that it doesn't bleed through.

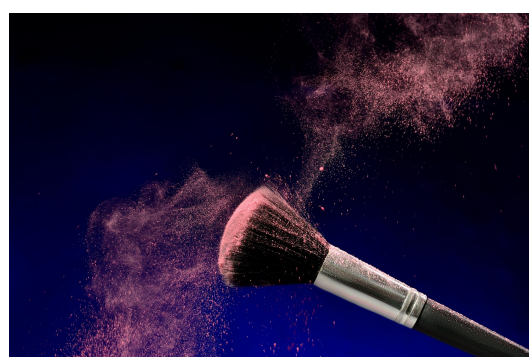

3.) FOUNDATION

Gently dab your foundation over the lipstick and powder. You start very lightly then build it up to cover any red that bled through. Only dab over the lipstick and powder.

4.) FACE POWDER

Repeat step 2. Gently cover the area with lipstick in face powder again. This will set it and stop any bleed through.

5.)FOUNDATION

You can now apply your foundation. Remember to cover the areas you have already worked on. As you work your way higher up the face, the foundation should be lighter and lighter.
